

Purpose A base cream that improves your foundation' s hold.

This base cream improves how your foundation holds and makes your makeup longer lasting. There are two types of base cream to choose from.

Gives the skin translucence and brightness.

Smooths out unevenness of the skin' s surface, improving the degree of adhesion of foundation.

Choose from two types of base cream "Oil Balance" and "Moist Balance" depending on what sort of finish you prefer.

Moist Balance

Maintains moist skin like just after completion of skin care.
* Protects skin from dryness.

Oil Balance

Balances sebum and makes makeup longer lasting.
* Maintains a matte look for many hours.

This light-feel base cream blends into the skin well and can be used all year round.

The wild rose extract and horse chestnut extract keep the skin moist.

Base Cream Moist Balance
<Makeup Base>
30g

Base Cream Oil Balance
<Makeup Base>
30g

How to Use Carefully blend it in to the skin.

Use this base cream before applying your foundation.

Step1 : Suitable amount = 2-3 pearls

Take 2-3 pearl grains on your fingertip and dot the cream on 5 points of your face, your forehead, both cheeks, nose and chin.

Quickly spread the cream over your whole face, from the centre of your face outwards using your fingertips.

Step2 : Blend into the skin well.

Carefully pat on the cream with your fingertips in the T-zone and around the nostrils and mouth where makeup tends to come off quicker, as well as on the area around the mouth, which moves a lot.

To finish, use the pads of your fingers to gently pat it on and blend it in.

point! "Giving your makeup a well blended in finish" just a little time and effort will get a beautiful finish – that is the key point in getting makeup to last longer.

○ Where to use Oil Balance and where to use Moist Balance.

When you want to prevent your makeup coming off, but you are also concerned about dryness, we recommend you use each of these on different areas of your face.

Use Oil Balance on the T-zone where there is a lot of sebum secretion and makeup tends to come off easily.

Use Moist Balance on those areas of your face where you are concerned about dryness.

Both of these base creams are a natural beige colour that gives the skin brightness and translucence.

“Oil Balance” for those areas where you want a matte finish.

The action of sebum adsorbing ingredients and spherical porous silica beads captures excess sebum. Thus, balancing the sebum and maintaining the matte finish.

- Soaks up sebum quickly.

Soaks up sebum and perspiration, prevents makeup coming off, and the high-level of breathability maintains the matte look.

“Moist Balance” for those areas where you want a dewy finish.

The formulation of hydrating ingredients, such as moisture-rich squalane, creates moist skin with a dewy finish.

○ Use a sunscreen before applying base cream.

When using a sunscreen, put it on first before using base cream.

Blend the sunscreen into your skin well, then wait a little while (around 2~3 minutes) before applying base cream.

* Blend both into your skin thoroughly to ensure that they are used effectively.

A skin care step when you use the sunscreen.

~ skin care to foundation ~

- I Skin care *You perform usual skin care.
- II Sunscreen *Blend into the skin well.
- III 2-3 minutes *You put time of two or three minutes.
- IV Base cream : Oil Balance or Moist Balance
- V Foundation

○ Use a suitable amount (2 ~ 3 pearls) of Base Cream for your skin to protect.

The Mirus series base creams Oil Balance and Moist Balance not only improve the application and hold of foundation, they also protect your skin from external irritation.

Make sure you use a suitable amount in order to properly guard your skin.

Quantity to use at once =  × two ~ three Pearl grain size

* If you use too little, it will not be enough to create a veil of base cream to properly protect your skin.

Purpose A foundation that creates beautiful, natural skin.

This is a two-way type foundation that deftly manipulates light to give your skin a natural, beautiful finish.

Covers areas of concern such as blemishes, dullness, pores, small lines, etc. with a veil of light.

* The special powder reflects light off your skin multi-directionally, obscuring shadows you may be concerned about, such as those from pores and small lines, making your skin look finely-textured and beautiful from whatever angle it is viewed.

* The soft-focus powder conceals blemishes and dullness making the skin look more translucent.

It gives a natural, non-heavy, non-powdery finish while also protecting the skin.

The sebum adsorbing powder prevents makeup coming off, keeping your makeup looking beautiful for longer.

The powder, which is coated in plant-derived amino acids, maintains the skin's moisture.

This light-feel foundation can be used all year round.

Naturalpact [Refill]

<Foundation>

12g

Puff included

* Case sold separately

Naturalpact Case

Naturalpact Puff

* The foundation colour shades are standardized so that they are the same as the liquid foundation colour shades.

How to Use Use the puff for an even more beautiful finish.

Prepare your skin using base cream (makeup base)

Step1 : Chose a colour that matches your skin.

Point : Vary the amount you put on.

① Vary the amount of foundation in order from your ● cheeks where you want to get good coverage to your ●●.

② Create a thinner finish on the ● T-zone and around the nostrils where makeup tends to come off faster, as well as around the eyes and mouth areas which tend to move more.

③ Lastly, finish off by blending and gently tapering at your ● face line and hairline.

When choosing your foundation colour, match it with the skin tone from your cheeks to your chin, while also keeping in mind the colour of your neck.

Step2 : How to spread your foundation.

Use the large surface of puff A on the large surface areas, such as your cheeks and forehead, spreading the foundation by gliding the puff from the centre of the face outwards.

Use the triangular puff B for the finer areas, such as around the eyes and mouth and for the nostrils, etc., build up coverage by gently patting on foundation.

* If you prefer to use water, wet the puff with water and gently wring it out before use. If you have wetted the puff, drain it well before you put it back in the case.

Mirus Series Standardized Colour Chart

With just a little time and effort you can get a much better finish.

When applying foundation around your eyes, mouth, and nostrils using the puff, use your other hand (the hand not holding the puff) to gently pull up the sides of your eyes and corners of the mouth and carefully blend it in. This will give you a more beautiful, longer lasting makeup finish.

Keep the puff clean.

A dirty puff can make foundation difficult to apply and stick, impacting on the finish obtained.

So please make sure you use a clean puff.

<How to Wash the Puff>

When the puff gets dirty, dissolve a small amount of a mild detergent in lukewarm water and wash by pressing gently. Rinse it thoroughly to prevent detergent residual in the puff, then drain and dry it well in the shade before use.

* Puffs are consumables.

When you notice the usability of the puff has changed, replace it with a new one.

Installing the refill

How to insert the separately sold Mirus Naturalpact [REFILL] into the Mirus Naturalpact Case.

Hold both sides of the middle plate of the Mirus Naturalpact [REFILL] and remove it from the package.

Place the middle plate (1 **A**) and the clear film (1 **B**) into the Case.

Push down on the centre of the middle plate from top of the film with the ball of your finger until you hear a click (See the arrow in Figure 1).

To remove the middle plate from the Case, push it up with the tip of a pen, etc., through one of the holes in the bottom of the Case (2 **C**).

mirus mirus liquid foundation

Purpose A foundation that creates beautiful, dewy skin.

This is a liquid foundation that deftly manipulates light to give your skin a dewy, elegant, beautiful finish.

Covers areas of concern such as blemishes, dullness, pores, small lines, etc. with a veil of light.

* The special powder reflects light off your skin multi-directionally, obscuring shadows you may be concerned about, such as those from pores and small lines, making your skin look finely-textured and beautiful from whatever angle it is viewed.

* The soft-focus powder conceals blemishes and dullness making the skin look more translucent.

It gives your skin a well-moisturized finish with a natural coverage while also protecting the skin.

The sebum adsorbing powder prevents makeup coming off, keeping your makeup looking beautiful for longer.

The wild rose extract and horse chestnut extract keep the skin moist.

This light-feel foundation blends into the skin well and can be used all year round.

Liquid Foundation

Liquid Foundation Puff

* The foundation colour shades are standardized so that they are the same as the Naturalpact colour shades.

How to Use Use the puff for an even more beautiful finish.

Prepare your skin using base cream (makeup base) before using foundation.

Step 1 : Dot foundation on 5 points of your face and quickly spread it out.

Take 1-2 pearl grains on your fingertip and dot foundation on 5 points of your face, your ● forehead, both cheeks, nose and chin.

Quickly spread the foundation over your whole face, from the centre of your face outwards using your fingertips.

Step 2 : Finish using the puff. Use the puff for an even more beautiful finish.

○ Use less on the areas where makeup tends to come off quicker, such as around the nostrils and mouth, as well as on the area around the eyes where facial expression lines tend to form, gently pressing the foundation on using the end of the puff.

Use the large surface of the puff on the large surface areas, such as your cheeks and forehead, gently spreading the foundation by gliding the puff from the centre of the face outwards.

For a natural finish, use the clean side of the puff to blend and gently taper at your ● face line and hairline.

Various Mirus series combinations

The Mirus series has been formulated so that the products contain the same standardized powder. Layering products will still allow a natural, non-heavy finish to be achieved.

mirus mirus pressed powder

Purpose A powder that makes the skin look more finely-textured and more translucent.

This powder gives your foundation a more finely-textured, translucent finish.

This soft, finely-textured powder smoothly spreads over the skin giving comfort every time you use it.

It gives your skin a lovely bright, translucent finish while also protecting the skin.

Covers areas of concern such as blemishes, dullness, pores, small lines, etc. with a veil of light.

* The special powder reflects light off your skin multi-directionally, obscuring shadows you may be concerned about, such as those from pores and small lines, making your skin look finely-textured and beautiful from whatever angle it is viewed.

* The soft-focus powder conceals blemishes and dullness making the skin look more translucent.

The sebum adsorbing powder, which quickly soaks up sebum and perspiration, prevents makeup coming off, keeping your makeup looking beautiful for longer.

This light-feel foundation blends into the skin well and can be used all year round.

The wild rose extract and horse chestnut extract keep the skin moist.

Pressed Powder Case

Pressed Powder Puff

How to Use Smooth onto the skin in a gentle spiral motion.

Use this pressed powder as a finish for your foundation.

- Step 1 :** Check to make sure that your foundation is even. Put a suitable amount on the puff, press gently onto the back of your hand and remove excess powder.

Glide the puff over the skin in a gentle spiral motion so as not to disturb your foundation.

- Step 2 :** Finish off the finer areas.

Use the puff carefully, pressing gently on the delicate areas around the eyes, and around the nostrils and mouth.

Carefully layer powder over the T-zone and around the nostrils where makeup tends to come off more quickly.

Mirus series light tricks

* The skin's translucence is created by the horny cell layer which is a mere 0.02mm thick on the surface of the skin. The horny cell layer is more translucent in younger people and becomes less translucent as we age.

Fit powder blends into the skin well to create an illusory horny cell layer with a veil that bounces back light beautifully just as on young skin.

* Pores and lines are like hollows or grooves in the skin. When light shines from one direction shadows are clearly visible making flaws noticeable.

Foggy Powder and Pure Skin Powder are powders that have a special structure that control the light shone on the skin and eliminate shadows from pores and lines.

Fit Powder

Fit powder is thinner than a layer of skin horny cell layer cells, creating a veil of light on top of the skin.

Creates a natural, clear skin just like bare skin.

Foggy Powder

Diffuses light multi-directionally eliminating shadows from fine lines, pores and unevenness of the skin, so that pores lines and are not so noticeable.

Pure Skin Powder

Covers skin colour tone concerns, such as blemishes, freckles, acne scars, dullness, etc.

The balance of light reflected off the surface and light reflected from internally create the translucence.

Makeup touchups are easy

Gently press a tissue against the areas of the face that look shiny.

Using the clean side of the puff, gently pat the places where you want to touch up your makeup to freshen up the skin in these areas.

Use Pressed Powder or Naturalpact on the puff and gently press on.

Installing the refill

How to insert the separately sold Mirus Pressed Powder [REFILL] into the Mirus Pressed Powder Case.

Hold both sides of the middle plate of the Mirus Pressed Powder [REFILL] and remove it from the package.

Insert the middle plate (**A** in Figure on the right) and the clear film (**B** in Figure on the right) of Mirus Pressed Powder into the Mirus Pressed Powder Case. Push down on the middle plate from on top of the film with the ball of your finger.

To remove the middle plate from the Case, push it up with the tip of a pen, etc., through one of the holes in the bottom of the Case.
